

A close-up photograph of a bartender wearing a black apron, pouring a clear liquid from a stainless steel jigger into a stainless steel cocktail shaker. The bartender is holding a glass with ice and liquid in their other hand. The background shows a bar with various bottles and a crystal glass holder on the counter.

GenWare

Vol. 2

Drink, Glass & Barware

Welcome to the Genware **Drink, Glass & Barware** Collection

The Genware Range of Barware and Glassware is perfect for drink service.

This collection combines barware, glassware and drinkware to show how to prepare and serve cocktails and drinks.

Glassware

GenWare Glassware is an exciting, concise and durable range of quality glassware, designed to fulfil the key needs of the foodservice industry. Stemware, Tumblers, Beer glasses, Shots and Cocktail glasses, Hot Beverage and Dessert glassware are included, covering a large number of applications and establishment needs.

We offer a rim and foot chip guarantee on all stemware. In order to prolong the life and quality of your glassware in use, we recommend following our product care and guidance information at www.nevilleuk.com/contentpage/productcare

*A concise range of elegant,
durable glassware*

Fully Tempered Fine Glassware

SHEER RIM

Sheer rim glasses feature a fine and beadless edge which has been produced to give optimal contact with the mouth enabling wine to be directed to specific tasting areas.

SEAMLESS FLAME POLISHED STEM

No seam between the bowl and stem, ensuring a more enjoyable drinking experience and an aesthetically pleasing glass.

HEAT RESISTANT

Thermal shock tested and resistant to 135°C and can withstand changes in temperature from hot to cold.

RIM TO FOOT TEMPERED

Fully tempered glasses are resistant to mechanical shocks, extending the life of the product by five times, compared with non tempered glass.

DISHWASHER SAFE

Strong and durable, shock tested and capable of industrial dishwasher cycles, while maintaining clarity.

WHAT IS TEMPERED GLASSWARE?

Tempering is a thermal process of heating a glass close to melting point then cooling it rapidly. This causes the outer surface of the glass to cool and shrink faster than the inside of the glass wall, creating a tight skin. This closes the many hairline fractures that naturally occur in regular annealed glass and make a vastly stronger product.

HOW STRONG IS TEMPERED GLASS?

Tempered glass is 5 times stronger. This is known as Mechanical Shock Resistance, making a cost effective choice.

ARE ALL GLASSES FULLY TEMPERED?

All glassware with a "T" placed on it are fully tempered from rim to foot both inside and out. Not all manufacturers temper to the same high standards.

IS TEMPERED GLASSWARE MORE RESISTANT TO TEMPERATURE CHANGES?

Fully Tempered items are resistant to 135°C temperature changes. This is tested by taking an item of glass from the oven at 135°C and then plunging it into cold water. The glassware will not shatter or break.

WHAT DOES SHEER RIM MEAN?

Sheer rim glasses feature a fine and beadless edge which has been produced to give optimal contact with the mouth, enabling a superior drinking experience.

Drinkware

The GenWare range of Drinkware covers a selection of stylish and innovative vessels, mugs, pots, cones and cups that work perfectly as alternatives to traditional glassware for the presentation of cocktails and cold beverages.

Copper and Stainless Steel Martini Glasses are perfect modern substitutes to the classic martini when serving stylish cocktails. Whilst our designs of Copper Mug provide a seriously cool way to serve popular cocktails such as a Moscow Mule or a Paloma.

Tiki Mugs add to the fun factor when presenting cocktails, evoking the spirit of the South Pacific.

*A contemporary collection
of stylish drinkware*

All items are priced and sold individually

Glassware

Dishwashing

Our range of glassware is designed to be washed in commercial glasswashers, except our Double Walled glasses, which should be hand washed only. To ensure the on-going quality of the product we recommend the following.

All new glasses should be washed before first use. Glassware should not be washed at temperatures above 60°C as this can cause debris to be baked onto the glasses during the washing process. Glasses that are found to have been cracked or chipped in use should be disposed of and not placed into the dishwasher. Non-caustic detergents should be used as caustic detergents can damage and dull the surface of the glass.

Storage

To avoid damage to glassware when not in use, we recommend storing glassware in correctly sized compartment glass racks.

Alternatively, as a guide you can use the below matrix to help you select the correct glass rack. Please ensure you have the exact glass height and the diameter of the glass at its widest point.

Max. Glass Height	Max. Diameter Ø					
	54mm	68mm	83mm	108mm	145mm	
Base Rack	79mm	GR49	GR36	GR25	GR16	GR9
Rack + 1 Ext	121mm	GR49-1	GR36-1	GR25-1	GR16-1	GR9-1
Rack + 2 Ext	160mm	GR49-2	GR36-2	GR25-2	GR16-2	GR9-2
Rack + 3 Ext	202mm	GR49-3	GR36-3	GR25-3	GR16-3	GR9-3
Rack + 4 Ext	246mm	GR49-4	GR36-4	GR25-4	GR16-4	GR9-4

For each of the measurements, select the following;

Glass Height: Always select the Max. Glass Height row that is exact or larger than the height of your glass.

Max. Diameter (Ø): Again select the maximum diameter of your glass that is exact or larger and follow this column to the row that you selected for the height.

For example, if your glass is 85mm high and has a maximum diameter of 70mm. You select the row 121mm and then select the Max. Diameter column you select is 83mm. This glass would need a rack GR25-1.

Do not stack glassware that is not recommended as stackable.

Do not store or place cutlery in glasses as this can damage and mark the surface of the glass.

Guidance

To prolong the life of hot drinks glasses we recommend pre-heating the glasses by running them under a hot tap.

Do not put cold liquids straight into glassware that may be hot or warm as this can cause cracks.

Enamelware

Due to the nature of this product, the outer porcelain layer can chip over time. When this happens the steel below naturally oxidises and the enamelware remains safe to use.

To prolong the life of enamelware we recommend the following:

- Wash before first use
- Before use, use a light coating of cooking oil to protect the enamelware from staining and makes the washing easier
- After use, soaking the product in warm or hot water and gently wash with a liquid detergent
- Do not use abrasive cleaning pads or gritty soap powders, as this may lead to chips
- Do not place empty enamelware or allow to boil dry on a hotplate or gas hob.

Copper Plating

Copper plating is as delicate as it is beautiful and should be handled with great care. Below are a few tips on how to care for your copper plated items.

Product Care Instructions

- Hand wash the product with warm water only, after every use
- Ensure you dry the product completely with a soft cloth after each wash
- When the product is displaying signs of tarnish, rub with a metal polish compound and soft cloth

Do Not

- Do not allow the copper plated surface to be in direct contact with foods that are acidic in nature such as vinegar and lime
- Do not use the product over direct heat/flare
- Do not scrub the copper surface with an abrasive sponge
- Do not use industrial detergent on the copper plated surface
- Do not leave the product wet as permanent water marks may stain the surface
- Not for use in a dishwasher

Please be aware copper will naturally oxidise over a period of time

Genware products are manufactured to provide the robustness and durability required for maximum performance in the hospitality and foodservice industry.

We want you to be confident in your purchase and gain the maximum life and value from your Genware products, so we have compiled the following guidelines to assist you. However, should you have any further questions, please contact your Genware distributor directly.

We recommend for all of our products that are intended to come into contact with foodstuffs to remove any labels or packaging and to wash, rinse and dry before first use.

Gun Metal Black

Below are a few tips to help prolong the life of your Gun Metal Black Barware and drinkware items.

Product Care Instructions

- Hand wash the product with warm water only, after every use
- Ensure you dry the product completely with a soft cloth after each wash
- When the product is displaying signs of tarnish, rub with a metal polish compound and soft cloth

Do Not

- Do not use the product over direct heat/flare
- Do not scrub the Gun Metal surface with an abrasive sponge
- Do not use industrial detergent on the Gun Metal surface
- Do not leave the product wet as permanent water marks may stain the surface
- Not for use in a dishwasher

Stainless Steel

Throughout the Genware brochure you will find a wide range of products manufactured from stainless steel. Cared for correctly, stainless steel is a fantastic metal that can provide years of regular service and offers excellent value.

All of the stainless steel products within the Genware range are of the highest standard and should be free from any impurities that could be of detriment to its performance.

Stainless steel is often described as 'rustless' or 'rust resistant' which whilst having an element of truth, will only be the case if it is cared for correctly, including the use of our Peek Polish products.

All of our stainless steel products are dishwasher safe, unless otherwise identified, and should not be left to soak prior to washing.

Some of the key Genware ranges are manufactured from high quality stainless steel and have additional guidance specific to these products. Please see overleaf for further guidance.
