

Business Continuity Policy

Nevilles is committed to implementing a Business Continuity Management System (BCMS) to the international standard ISO22301:2019, this will form part of our integrated management system alongside ISO 9001:2015 and ISO 14001:2015.

We strive to develop a BCM system to improve company-wide resilience in the event of significant business disruption, which provides a framework for measuring and improving performance. We will prepare and maintain Business Continuity Plans to ensure that we can regain operational capability and continue to deliver our critical products and services, so far as it is reasonably practicable, when faced with an emergency.

We are committed to satisfying all statutory and regulatory requirements relative to our organisation's activities and the international standard.

This policy has been approved by the Senior Leadership Team, it will be reviewed annually, and if necessary revised. This is to ensure relevance and to keep it up to date.

A copy will be found internally on all employee forums and externally on our website. We welcome interested parties' comments to show our commitment to continual improvement.

A handwritten signature in black ink, appearing to read "T Jones". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Tristan Jones
Operations Director
