

Compliance Update - June 2026

At Nevilles, product safety and regulatory compliance remain our top priorities. In light of recent updates to EU regulations restricting the use of Bisphenol A (BPA) and with the UK expected to introduce similar restrictions in 2026, we are proactively taking action across our product ranges.

We want to reassure our customers that Nevilles is fully committed to eliminating BPA from all applicable products. We are actively working with our manufacturing partners to identify and remove any remaining instances of BPA within our portfolio, see Appendix I for list of remaining products to be processed.

As part of this commitment, we have established a clear transition plan, we are ensuring all plastic products and products with coatings containing plastic, are free from BPA, as per the regulatory requirements and this is scheduled for completion by the beginning of January 2027. Throughout this process, we will continue to ensure that all products meet the highest safety standards and comply with evolving regulatory requirements.

We appreciate your continued trust in Nevilles and will provide further updates as we progress towards this important milestone.

Alongside this regulation, we also have committed to complying with the EU Deforestation Regulation (EU) 2023/1115. All products supplied to the EU within scope are verified as deforestation-free, legally compliant, and supported by a Due Diligence System which includes EU TRACES. Relevant supply chain information and Due Diligence Statement (DDS) references will be supplied on our sales, shipping and invoice documentation. See Appendix II for confirmation

Products designated for the UK market only, will be clearly identified within our marketing material/website and will not be supplied to the EU unless brought into full EUDR compliance.
